Film program for May, 1957

"Expedicão Biologica"
and
"The Machris Brazilian Expedition"

Two color films which depict the museum's recent large-scale biological expedition to the headwaters of the Rio Tocantins in the Amazon basin of Central Brazil.

Concurrent with the showing of the above films there will be an exhibition of biological materials collected by scientists on the Brazilian Expedition. The exhibit will be on display in the main foyer of the Los Angeles Museum from April 26 to May 26, 1957. Represented in the exhibit will be materials embracing the fields of Anthropology, Botany, Entomology and Ornithology.
